Dust Cover

Dust Covers protect the lock cylinder and key from adverse environmental conditions such as moisture, dirt, and sleet. The Dust Covers also protect the key from accidental damage. We highly recommend dust covers for outdoor installations.

Flip Open Dust Cover (Part# SC4292NP)

The Flip Open Dust Cover is hinged and held closed with spring tension. It is designed to protect the lock cylinder when the key is removed. The Flip Open Dust Cover is attached to the lock cylinder with a stainless steel set screw.

To order dust covers with your interlocks put the letter "F" in the appropriate column of the interlock part number. Reference the MD Series Ordering Guide. Multi-cylinder interlocks will be supplied with a cover on each cylinder (if specified). The Flip Open Dust Cover is made from 316 stainless steel.
